

For Immediate Release - Lofty Perch Inc. Press Release

Lofty Perch and Endeavor Security partner to deliver secure solutions for industrial control systems

Toronto, Canada — March 27, 2007 –

Lofty Perch Inc., a global leader in security technology for industrial control and SCADA systems, announced today a partnership with Endeavor Security Inc. Endeavor Security's flagship technology, the FirstLight Early Warning and Signature Service, will be used to provide real-time attack detection and signature generation for the LoftyPerch security management suite. Endeavor's market leading FirstLight pattern recognition algorithms will be used to recognize previously unseen threats in control system networks and refine the Endeavor global knowledgebase.

"Network security intelligence and warning is at the core of our solutions suite," says Mark Fabro, CEO of Lofty Perch Inc, "Leveraging the Endeavor FirstLight technology and early warning system enhances our ability to protect our client's systems, maintain thought leadership in the control systems community, and continue to deliver the unique security intelligence solutions that is so richly needed in the control systems domain."

"The relationship between Lofty Perch and Endeavor Security represents two strong leaders in their respective fields combining their strengths to address a serious security problem. We have been interested in identifying technology leaders in the control system security space who best suit our FirstLight engines and can leverage our market leading knowledge base. Lofty Perch is the ideal partner for Endeavor," said Christopher Jordan, CEO of Endeavor Security. "There are very few companies today with the depth and experience required to reduce the cyber risk in large-scale industrial systems.

Lofty Perch will immediately begin offering joint products and solutions to the market as the companies continue to work on research and development in industrial control systems security.

About Lofty Perch Inc.

Lofty Perch Inc is a global leader in providing cyber security solutions and services to government and private critical infrastructure organizations. Working with Idaho National Laboratory and DHS Control Systems Security Program doing Cyber security assessments, training, and developing recommended practices to industry, Lofty Perch Inc. is a privately held company founded in 2005 and headquartered in Toronto, Canada, with US offices in Los Angeles, California. About Endeavor Security

Endeavor Security provides a global Early Warning Service and a software *knowledgebase* to security device vendors. We produce timely and accurate security knowledge in the format that our customers can leverage to reduce

costs, create depth, speed time-to-market, and to understand threats. Endeavor is an independent source of security knowledge, producing application detection, network antivirus definitions and malicious network signatures to multiple product vendors. This service enables the OEM vendors to concentrate on their core product technology differences, accelerate their release cycle, and be competitive in their early releases. Endeavor provides its technology to security product vendors and managed service providers for critical infrastructure including Government agencies, Financials, Telco/ISP, Utilities and Energy companies.

The FirstLight suite of products are focused on new threats and the ability to stop them using advanced, Patent Pending algorithms. The FirstLight sensor grid includes government and commercial entities. More information is at: <http://www.endeavorsecurity.com>
